

Study 4D-710-C001 is a Phase 1/2 gene therapy clinical trial sponsored by 4D Molecular Therapeutics, Inc. called 4D-710 in adults with cystic fibrosis lung disease.

WHY IS THE STUDY BEING CONDUCTED?

The purpose of the study is to see if 4D-710 is safe for use in adults with CF and to see if 4D-710 can help lung function.

4D-710 is a genetic medicine designed to deliver a copy of the Cystic Fibrosis Transmembrane Conductance Regulator (CFTR) gene to the lungs. The CFTR gene carries instructions for making normal CFTR protein.

WHO CAN PARTICIPATE?

You may be eligible to participate in the study if you:

- Are 18 years of age or older
- You do not qualify for or are unable to tolerate treatment with a CFTR modulator
- You meet other study criteria that the study staff will discuss with you

ABOUT THE STUDY

- **4D Molecular Therapeutics** (4DMT) is funding this study
- You will receive compensation for participation in the study
- Talk to the study staff for more information about this study

The Informed Consent Form (ICF) has more details about 4D-710 and the study. Please read the ICF carefully and ask the study doctor and research coordinator any questions you may have. 4D-710 has not been approved by the FDA or any other global health authority.

STUDY VISIT SCHEDULE

This chart shows you the length of the study and how many study visits will take place in the clinic or by phone.

SCREENING VISIT	4D-710 GIVEN		OBSERVATION PERIOD										LONG-TERM FOLLOW-UP PERIOD			
-28 days	Day 1	Day 2 (depending on dose level)	Day 7	Day 14	Day 21	Day 28	Month 2	Month 3	Month 4	Month 6	Month 9	Month 12	Month 15	Month 18	Month 21	Month 24
		 or 			 or 											

More information about the study procedures and assessments that will be performed at each visit can be found in the Informed Consent Form (ICF).

Please read the ICF carefully and ask the study doctor and research coordinator any questions you may have.
